Developed from Fuller® design and technology, FLSmidth's Ful-Vane™ Gas Compressors provide more compression with less energy: - Large inlet area provides efficient capture of large gas flows - Only three moving parts for minimal mechanical losses - Constant blade-to-cylinder contact results in constant compression efficiency - Shaft and bearing design minimizes drive losses - Inlet/outlet configuration eliminates internal compression losses - Suited for operation with variable frequency drive

Ful-Vane Gas Compressor - Fluid Technology

Simplicity of design and operation are the keys to the success of the Ful-Vane™ air, gas and vacuum compressor. Especially when compared to the complex, high-speed rotary screw compressors; Ful-Vane compressors have fewer than half the moving parts, all of which are easily accessed and field replaceable.

Rotary vane customers are very loyal and generally do not switch to a rotary screw due to their success with the vane and ease of service. In some cases, the rotary vane offers more airflow than other technology. For example, the BLADE 5, 7.5 horsepower compressor offers 31 CFM @ 115 PSI, no other rotary screw 7.5 hp unit comes close. The Mattei vane air compressor offers air ends that last up to 100,000 hours without requiring a overhaul. The modern compact design offers all types of ...
