History And Experiences Of He

Experience is the first person effects or influence of an event or subject gained through involvement in or exposure to it. The term does not imply that useful or long term learning, or the acquisition of skills necessarily takes place as a consequence of the experience, though the two are often associated, and experience is often used as a proxy for competence.

The history of photovoltaic energy (aka. solar cells) started way back in 1876. William Grylls Adams along with a student of his, Richard Day, discovered that when selenium was exposed to light, it produced electricity. An electricity expert, Werner von Siemens, stated that the discovery was "scientifically of the most far-reaching importance".
